FOREWORD V

INTRODUCTION VII

CASE STUDIES 1

Case #1: 50 yo man with a history of glioblastoma and fluctuating sleepiness 2

Case #2: 6 yo boy with several episodes of flashing lights and migraine-like headache 4

Case #3a: 21 yo woman with generalized convulsive refractory status epilepticus (viral encephalitis). 6

Case #3b: 76 yo man with refractory, prolonged complex-partial status epilepticus (acute stroke). Both patients are on thiopental-induced coma..... 7

Case #4: 7 yo boy with stagnation of development; recorded during sleep..... 8

Case #5: 9 yo girl with nocturnal behavioral disturbances undergoing a night study..... 9

Case #6: 61 yo woman with a meningioma and intermittent speech arrests (consecutive images). 10

Case #7: 38 yo woman with shifting acral paresthesias. 12

Case #8: 22 yo woman with recurrent complex partial seizures after viral encephalitis (consecutive images). 14

Case #9: 33 yo woman with headache and loss of consciousness 2 days before her EEG..... 18

Case #10: 32 yo man with mental retardation and frequent spells (convulsions, loss of contact with automatisms, falling episodes). 19

Case #11: 15 yo boy with morning jerks..... 21

Case #12: 78 yo man found in a confusional state, now in remission..... 22

Case #13: 23 yo woman with convulsions on awakening..... 24

Case #14: 3 months old infant with viral meningitis and seizures..... 25

Case #15: 61 yo woman with unexplained spells. 26

Case #16: 59 yo woman with intermittent sensory disturbances over the left limbs. 28

Case #17: 17 yo girl with repetitive feeling of “d  j   vu” and a convulsive seizure..... 29

Case #18: 49 yo man with repetitive loss of consciousness and a history of chronic headache. 31

Case #19: 50 yo man with intermittent vertigo and sensory disturbances over both hands. 32

Case #20: 61 yo woman with a heat stroke and stupor. 34

Case #21: 5 yo boy with visual hallucinations followed by intense headache..... 35

Case #22: 13 yo girl with a generalized seizure in the morning..... 37

Case #23: 35 yo man with episodes of throbbing headache (second and third images taken at the same time). 39

Case #24: 2 yo girl with a prolonged febrile convulsion..... 42

Case #25: 74 yo woman with progressive cognitive deterioration over 6 weeks. 43

Case #26: 70 yo man with intermittent memory disturbances.	44
Case #27: 44 yo woman with anaplastic astrocytoma and facial twitches.	45
Case #28: 10 yo girl after a generalized convulsion on awakening.	46
Case #29: 56 yo woman with lower limb shaking after parasagittal aneurysm bleeding.	47
Case #30: 49 yo woman with episodes of forced thinking and a spell with contact loss (images taken at the same moment).	48
Case #31: 63 yo woman with a frontal mass and fluctuating behavioral changes (two consecutive images).	51
Case #32: 11 yo boy with mental retardation and several seizure patterns.	53
Case #33: 46 yo woman with auditory hallucinations (images taken at the same moment).	55
Case #34: 70 yo woman with fluctuating speech disturbances after a minor stroke.	57
Case #35: 65 yo woman with a history of generalized convulsions, now in remission.	59
Case #36: 22 yo man, still comatose 3 days after cardiac arrest.	60
Case #37: 46 yo man 2 weeks after an unexplained transient loss of consciousness (images taken at the same time).	61
Case #38: 6 months old baby with a suspicion of nocturnal convulsions.	63
Case #39: 65 yo man complaining of several syncopes.	65
Case #40: 60 yo woman with repetitive, brief and stereotypical panic attacks (images taken at the same time).	66
Case #41: 22 yo woman with recurrent visual disturbances.	69
Case #42: 29 yo man with throbbing headache and aphasia.	70
Case #43: 22 yo man with a history of generalized convulsions on awakening.	71
Case #44: 25 yo man with acute glomerulonephritis and stupor.	72
Case #45: 56 yo woman with alcohol intoxication and stupor.	74
Case #46: 25 yo woman with history of an isolated generalized convulsion one year earlier.	75
Case #47: Premature newborn (35 weeks) with suspicion of spells.	76
Case #48: 72 yo woman with an acute hemispheric stroke and facial twitches.	77
Case #49: 26 yo man with recurrent visual elementary pseudo-hallucinations on the left.	78
Case #50: 43 yo man with a spell while driving.	79
Case #51: 17 yo girl with a history of seizures during childhood.	80
Case # 52: 51 yo woman with intermittent jerking of the right upper limb.	81
Case # 53: 44 yo man with repetitive episodes of brief nausea and crying; long-term monitoring.	82
Case #54: 44 yo woman with short episodes of loss of contact over several days (images taken at the same time).	84
Case #55: 15 yo girl with unexplained loss of consciousness.	86
Case #56: 20 yo woman after a first convulsive seizure.	87
Case #57: 75 yo man with intermittent confusion (series of epochs over 100 seconds: the first two, the middle two and the last screenshot are depicted here).	88

Case #58: 3 yo girl after a very prolonged febrile convulsion (images taken 1 second apart, the second being earlier).....	93
Case #59: 42 yo woman with repetitive episodes of bilateral paresthesia and visual disturbances, undergoing an ambulatory long-term EEG.....	95
Case #60: 25 yo man with chronic renal dysfunction and antibiotic treatment, confused.	96
Case #61: 20 yo man with a vague history of seizures in the past.	97
Case #62: 9 yo girl with a history of convulsive seizures during sleep, on long-term monitoring.	99
Case #63: 48 yo man treated since adolescence for epilepsy (myoclonic jerks and generalized convulsive seizures).....	101
Case #64: 74 yo woman after a stroke, now with fluctuating speech disturbances (images taken at the same time).....	102
Case #65: 52 yo man after a seizure following a cocaine intoxication.....	104
Case #66: 74 yo woman with a fluctuating confusional state.	105
Case #67: 61 yo man with a fluctuating hemi-paralysis 1 month after a stroke.	107
Case #68: 36 yo woman with repetitive episodes of loss of consciousness (4 consecutive images).	109
Case #69: 31 yo man after a convulsive seizure following alcohol withdrawal.	113
Case #70: 6 yo girl with a history of generalized convulsions (consecutive images).....	114
Case #71: 21 yo man, unconscious after a suicidal attempt by hanging. Image 1 at 2 days, 2 at 3 days, and 3 at 4 days.	116
Case #72: 56 yo man 10 years after an occasional, provoked convulsive seizure.	119
Case #73: 6 yo girl, inattentive at school.	120
Case #74: 44 yo man with repetitive episodes of paresthesia over the left face, undergoing long-term monitoring (images taken at the same time).....	121
Case #75: 4 yo boy with generalized seizures on awakening.	123
Case #76: 28 yo man with intermittent dysarthria (2 consecutive images, the third one being taken 10 seconds after the end of the second.	124
Case #77: 1 yo boy with spasms and a developmental decline, recorded during sleep.	127
Case #78: 70 yo woman with profound dementia, still unresponsive after treatment of an intercurrent episode of status epilepticus (2 consecutive images).	128
Case #79: 56 yo man 24 hours after a recurrent focal seizure.....	130
Case #80: 27 yo man, found comatose at home.	131
