

SPECIAL ISSUE

Human Perception of Verticality: Lateropulsion & Retropulsion in Neurological Disorders

Papers presented at the symposium in Bad Aibling on May 09–10, 2019

SHORT REVIEWS & ARTICLES

S3 Comparing and contrasting clinical outcome measures for pusher behavior

R. Koter

S7 Development of a clinical scale to assess retropulsion in neurological disorders

J. Bergmann, C. Krewer, E. Koenig, F. Müller, K. Jahn

S18 Assessment of verticality perception – tools and clinical application

A. Zwergal, T. Brandt, M. Dieterich

S23 Multisensory control of posture: Clinical assessment and disorders

K. Jahn, F. Müller, C. Krewer, J. Bergmann

S26 Postural orientation with conflicting visual and graviceptive cues to ‘upright’ among individuals with and without a history of post-stroke ‘pushing’

A. Mansfield, B. Taati, C. J. Danells, L. E. Fraser, L. R. Harris, J. L. Campos

S33 Psychomotor disadaptation syndrome

P. Manckoundia, F. Mourey

S37 The effect of trunk exercises on the perception of verticality after stroke: A pilot study

W. Saeys, S. Truijen

S42 Brain imaging studies in pusher behavior: a narrative review

C. Krewer, J. Bergmann, F. Müller, K. Jahn

S44 Recovery from lateropulsion: The role of lesion side and impairments

S. Babyar, M. Reding

S49 Pusher behavior visual feedback training is helpful

D. Broetz

S50 Non-invasive brain stimulation to treat disorders of human verticality

T. E. G. Santos, D. J. Edwards

S54 Robot assisted gait training for pusher behavior

F. Müller, J. Bergmann, K. Jahn, C. Krewer

W. Schupp, B. Elsner (Hg.)

Sensomotorische Neurorehabilitation

Therapieoptionen und Versorgungsalltag – Erfahrungen zwischen Evidenz und Praxis

Hippocampus Verlag 2017
176 Seiten, 40 Abb., 34 Tab.
Hardcover, € 19,80
ISBN 978-3-944551-25-8

Das vorliegende Buch soll einen Überblick über die Möglichkeiten des Einsatzes und den Stand der wissenschaftlichen Evaluation technischer Hilfsmittel in der Neurorehabilitation geben.

Die Themen:

- Versorgungsalltag für Hilfsmittel in (Reha-)Klinik und Praxis
- Leitlinien und Behandlungspfade
- Einlagenversorgung
- Funktionelle Elektrostimulation
- Aktivitätsförderung bei neuroorthopädischen Gangstörungen
- Einsatz von Orthesen
- Teilhabeorientierung in der Neurorehabilitation
- Eigentraining bei Armparesen

Mit Beiträgen von

M. Alfuth, T. Böing, B. Elsner,
R. Horst, S. Lamprecht, C. Pott,
W. Schupp, U. Thiel, E. Wieduwild

POSTER PRESENTATIONS

S56 The four-point pusher score (4PPS): an alternative simple screening tool for lateropulsion and pusher behaviour

E. Chow, S. Parkinson, A. Anderson, J. Jenkin, A. King, H. Maccanti, N. Minaee, K. Hill

S56 A virtual reality based therapy for improving the postural control of patients with critical-illness-polyneuropathy/-myopathy – a pilot study

T. Döringer, F. Müller, K. Jahn, M. Egger, J. Bergmann

S57 Interactive sonification for balance training in neurological rehabilitation

D. Fuchs, M. Knauer, P. Friedrich

S57 Gait stability in patients with mild Parkinson's Disease

M. Hoesl, A. de Cringis, J. Bergmann, S. v. d. Bos, M. Egger, T. Amberger, F. Mueller, K. Jahn

S58 Retropulsion and disturbed verticality perception in neurological patients

J. Jahnke, K. Jahn, F. Müller, J. Bergmann

S58 Research protocol: Should there be a push for change to service delivery for patients with lateropulsion?

J. Nolan, K. Chan , E. Godecke, B. Singer

S59 Deviations of the postural vertical in two dimensions in peripheral and central vestibular disorders

C. Selge, F. Schoeberl, S. Bardins, J. Bergmann, A. Schepermann, T. Brandt, M. Dieterich, K. Jahn

S60 Immediate effectiveness of single-session robot-assisted gait training in pusher behavior

M. Steinböck, C. Krewer, J. Bergmann, K. Jahn, F. Müller

S60 Training of repetitive weight shifting and orientation in space by using the Spacecurl® in patients with pusher behavior

S. Tillmann, J. Bergmann, C. Krewer, F. Müller, K. Jahn

S61 Postural control and risk of fall in neurological patients with retropulsion

J. Weghorn, K. Jahn, F. Müller, J. Bergmann

S61 Egocentric processing in the roll plane and dorsal parietal cortex: a

TMS-ERP study of the subjective visual vertical

L. Willacker, J. Dowsett, M. Dieterich, P. C. J. Taylor

S62 Increased susceptibility to visually induced biases in verticality perception with age

K. N. de Winkel, S. Nestmann
